Q&A

Where can this product be used?

This product is ideal for use in commercial, industrial, and food-service environments where heavy grease, carbon, and baked-on residues are present.

What is the active ingredient of this product?

The primary active ingredient is Sodium Hydroxide. It is responsible for the strong alkaline cleaning power and removal of carbonized and baked-on stains.

Why can I trust the antibacterial effectiveness of this product?

This product uses a powerful high-alkaline formulation (pH 13–14) that effectively breaks down grease, soils, and bacteria.

How is this product cost-effective for daily use?

Its highly concentrated formula delivers powerful cleaning performance at low dilution rates, reducing overall product consumption.

PRODUCT SPECIFICATIONS

Active Ingredient : Sodium Hydroxide - 11–30%
Net content : 5LT
Formulation : Clear brown liquid

DIRECTIONS OF USE

1. Dilute according to the level of soil and cleaning application.
2. Apply by spraying or wiping, allow to penetrate for 5–15 minutes.
3. Rinse thoroughly with water.
